

Over the past few months, the Ohio Cleaners Association has been working with Summit Energy to develop “The OCA Energy Program”. The OCA, in conjunction with Summit, has identified various opportunities to reduce costs on our members’ energy purchases. Therefore, it is with great pleasure to announce, as a service to our Members a complimentary energy analysis. The analysis will be performed, at no obligation to you whatsoever, by the same people that provide many Fortune 1000 companies energy management services.

With Summit as our strategic partner, you will have access to a team of energy and sustainability experts who can help you craft strategies that are field-tested by years of experience in the global energy markets.

In many Ohio markets, commercial & industrial companies have had the ability to purchase their natural gas and electrical requirements from parties other than their local utility company. These programs have allowed companies to reduce their energy costs by millions of dollars.

As you may have noticed, the energy markets have been retreating dramatically from last year’s astronomic highs. As a matter of fact, both natural gas & electricity are currently trading at a five-year low. With the recent drop in wholesale energy prices, an opportunity may exist to **lower your current utility rates by as much as 10-15%.**

To participate in this **Free Energy Analysis**, please complete the information form below and send it, along with a copy of *all pages* from your most current electric and natural gas bill, to Summit via fax or email. For more information, please contact Mike Farrer at 269.998.2899.

Because of the current volatility in the energy markets, Summit needs to be prepared to review, and possibly enroll, your account(s) without delay. Please respond as soon as possible.
